

Erasmus+

In the beginning our teacher proposed us to make a logo and an animation for the Erasmus+ project with the theme “Past, present and future – Memories and Dreams”.

At first it seemed challenging due to the fact that this theme can be represented in many ways therefore we decided to come up with an idea that would approach all of the topics.

After we analyzed all of our previous ideas we came to the conclusion that time is related with all the topics. Memories and dreams are intertwined with past and future, which is why we related a picture of a pocket watch (representing time) and memories seeing as a pocket watch is mostly related to old watches used in the XX century.

Seeing as a watch is also used to tell time in the present and that it can also help us with time in the future it also relates to the dreams that are kept in the future in hope someday we will be able to achieve our goals. We saw it as a good way to relate to the theme of this project. We of course made it so it would fit the flags of all the countries in this project.

The Team that made this possible:

Gonçalo Fernandes | Diogo Oliveira | Rodrigo Barradinhas | Tomás Ribeiro | Marian Miron
